

Internet Access Guidelines for ANSCSE22

1. For device with MS Windows 8/8.1/10

1.1 Open Wi-Fi connection and find the Wi-Fi name “Chula-guest”.

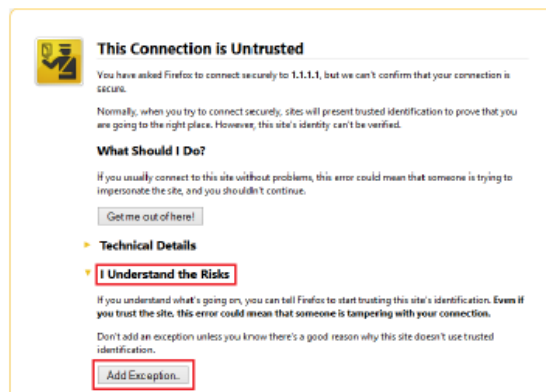

1.2 Click on “Chula-guest”, check a box “Connect automatically” and then click “Connect” button.

1.3 Enter the network security key, “pairiver” (without quote) and then click “Next” button.

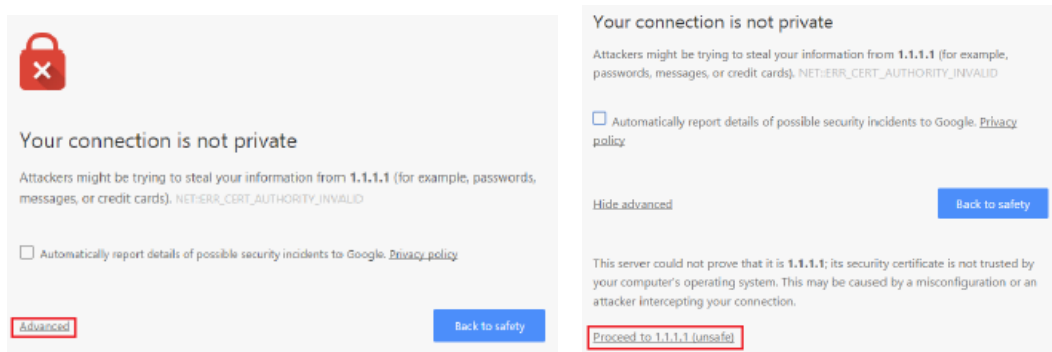

1.4 For the first-time connection, you have to choose which web browser you want to open a login link.

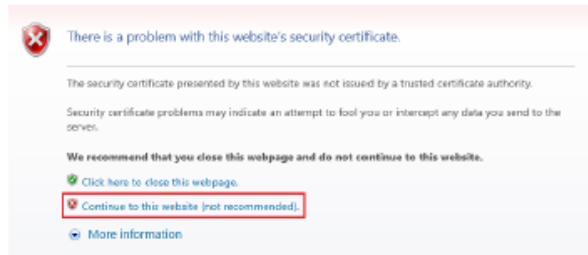

- If you choose Firefox, click “I Understand the Risks” and then “Add Exception” button.

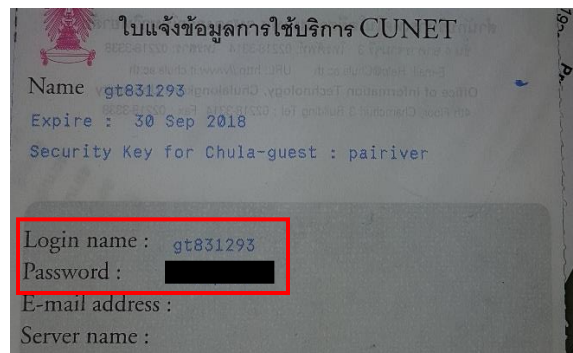

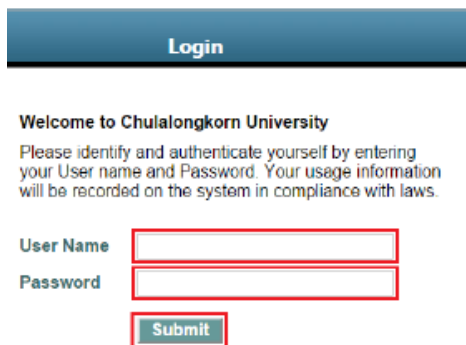

- If you choose Google Chrome, click “Advanced” and then “Proceed to 1.1.1.1 (unsafe)”.

- If you choose Internet Explorer, click “Continue to this website (not recommended)”.

- 1.5 Type the User Name (Login name) and Password, which is provided to you in the paper. Click “Submit” button. Then you are now ready to access the internet.

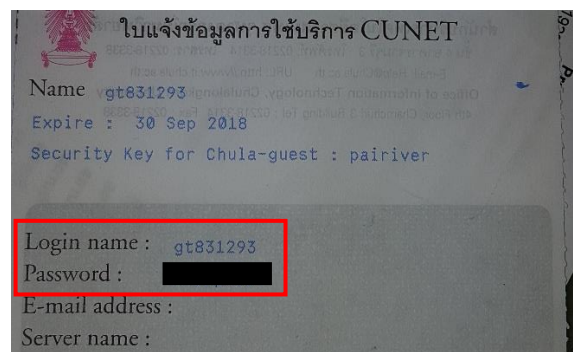

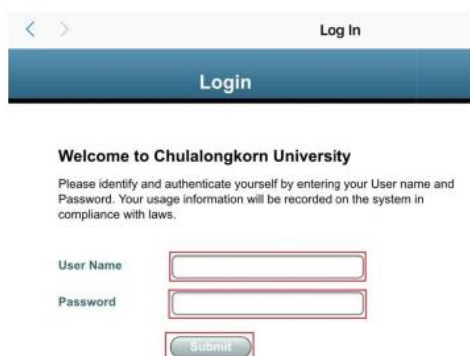

2. For device with iOS

- 2.1 Open “Settings” menu, select “Wi-Fi” and choose “Chula-guest”.

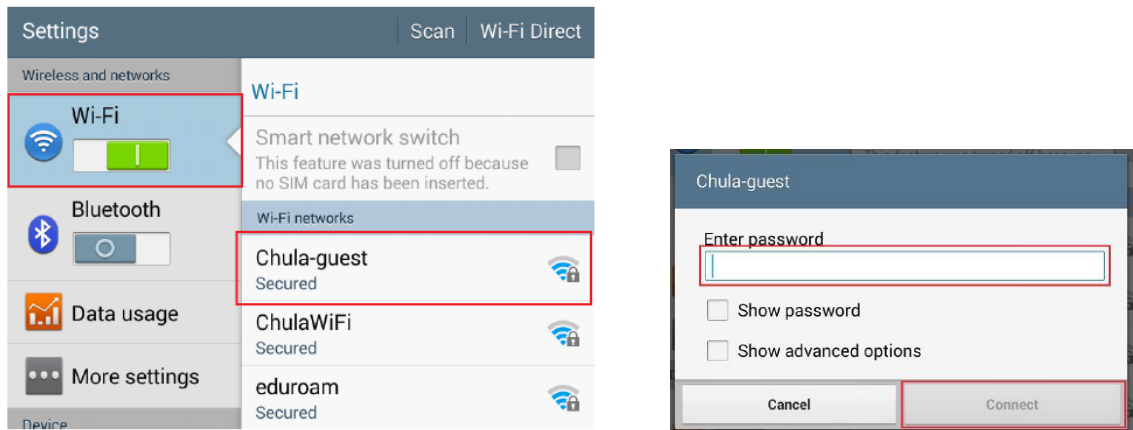

- 2.2 Enter the password “**pairiver**” (without quote), and then click “Join” button.
- 2.3 Type the User Name (Login name) and Password, which is provided to you in the paper. Click “Submit” button. Then you are now ready to access the internet.

3. For device with Android

3.1 Open “Settings” menu, select “Wi-Fi” and choose “Chula-guest”.

3.2 Enter the password “**pairiver**” (without quote), and then click “Connect” button.

3.3 Type the User Name (Login name) and Password, which is provided to you in the paper.

Click “Submit” button. Then you are now ready to access the internet.
